

Lucas Silva

Software Engineer

Website: <https://mence.dev/>

Email: mence.dev@proton.me

GitHub: <https://github.com/lucasmence>

LinkedIn: <https://www.linkedin.com/in/lucasmv96/>

Location: São Paulo, Brazil

Technical Skills

Programming Languages: C++ (6 years), JavaScript (React, Node) (4 years), PHP (2 years), Java (2 years), Python (2 years), Pascal (9 years)

Build Managers: CMAKE, npm **Version Control:** Git, subversion

Software: VisualStudio, Google Docs, IntelliJ/Android Studio, Unity, Slack, Trello, Eclipse, JIRA, Unix/Linux

Databases: SQL, SQLite, MySQL, MongoDB, Firebird, JSON

Relevant Work Experience

Backend API Development & Messaging Automation (2023)

- Developed a complete API for bulk message sending and receiving, enabling integration with external systems and message scheduling for customer contact lists. Built using Python and Django Rest Framework, deployed on Ubuntu with RabbitMQ and Gunicorn to ensure background processing and service persistence.

Server Automation & Maintenance (2023 – 2024)

- Designed and developed automated scripts and routines for backup and update processes on Ubuntu web servers using SSH, Bash commands, and crontab scheduling.

CI/CD Webhook Integration (2022)

- Integrated webhooks to detect pushes to the main Git branch and provide notifications about process completion or potential deployment issues.

Game Development & Engine Tooling (2019 – Current)

- Independently developed 2D games using C++ and the SFML library, including officially released titles, one of which was published on Steam as an experimental project. Also designed and built a custom map editor using the same map-reading system as the game engine, supporting terrains, rules, and game elements with shared resources.

Other Interests

RTS, Dungeons & Dragons, Winter, Pokemon, Dogs and Laptops.
